Rajan Kathiriya

Jr Front-End Developer

A highly motivated and skilled graduate looking for an entry-level position as a software engineer. Solid knowledge in writing well-designed and testable code. I am well verses with front-end library like react, redux , redux - thunk, redux saga, Node.js and MongoDB. Moreover, I have experience to make application responsive for different devices. I am currently looking for the opportunity for front-end development.

PROJECTS

Admission ERP (12/2022 - 05/2023)
- It's application has been developed using the next.js and material UI.
- This application is used for the automate the admission process for the institute. Application has developed in the two parts.
- Front Office can be used by the students for their login and back office is used for the admin or staffs of the institute.
- We have used expresss.js and MongoDB to store the data for the both project.
- Back office is used to maintain the inquiry, managing the students and exam of the students. We have developed inquiry form where students can inquiry about the courses and it will send the email as well as maintain the data for the application.

Restaurants Website
- Home Page https://spicefactory-home.netlify.app
- Admin panel https://spicefactory-admin.netlify.app
- Developed a web-based food order application that allows users to browse menus, place orders, and give review.
- Designed and implemented a responsive user interface using HTML, CSS, and JavaScript. Employed modern frameworks such as React.js to enhance the user experience and facilitate real-time updates.
- Developed the back-end using Node.js and Express.js, creating RESTful APIs for handling user requests, managing order data.
- Utilized a relational database management system (e.g., Mongodb) to store and retrieve user information, menu data, and order details.
